# MID WEST ADVANTAGE: CAPABILITY OVERVIEW

Image: Bruce Rock Engineering

## Acknowledgement of Country

---

The Mid West Development Commission (MWDC or the Commission) acknowledges the Yamatji people as the Traditional Owners of the Mid West region, which includes the Amangu, Nhanhagardi, Wilinyu, Naaguja, Badimia, Widi, Nanda, Mullewa Wadjari and Wajarri people.

The Commission also acknowledges the Yugunga-Nya people near the Western Desert and the Yued people to the south.

We recognise their continuing connection to land, waters and community and pay our respects to them and their cultures, and to Elders; past, present and emerging.

## Introduction

# 01

## The Mid West is open for business

The Mid West region of Western Australia stands at the forefront of industrial capability and economic opportunity. With a unique combination of natural resources, strategic infrastructure and a skilled local workforce, the region offers a compelling proposition for investors, manufacturers and service providers alike.

At the heart of the Mid West region's future comparative advantage is its energy landscape. The region boasts abundant natural gas reserves that support manufacturing and industrial operations, while the Clean Energy Link - North transmission project will unlock vast potential for renewable energy generation.

From wind and solar to emerging technologies, the Mid West is poised to become a powerhouse of clean energy innovation. This will drive major project growth across regional WA and deliver new downstream processing and manufacturing opportunities across adjacent and supporting industries.

### Regional Advantages

**Green energy production and transmission**

**Regional road and sea freight opportunities**

**Defence, radio astronomy and space-related industry opportunities**

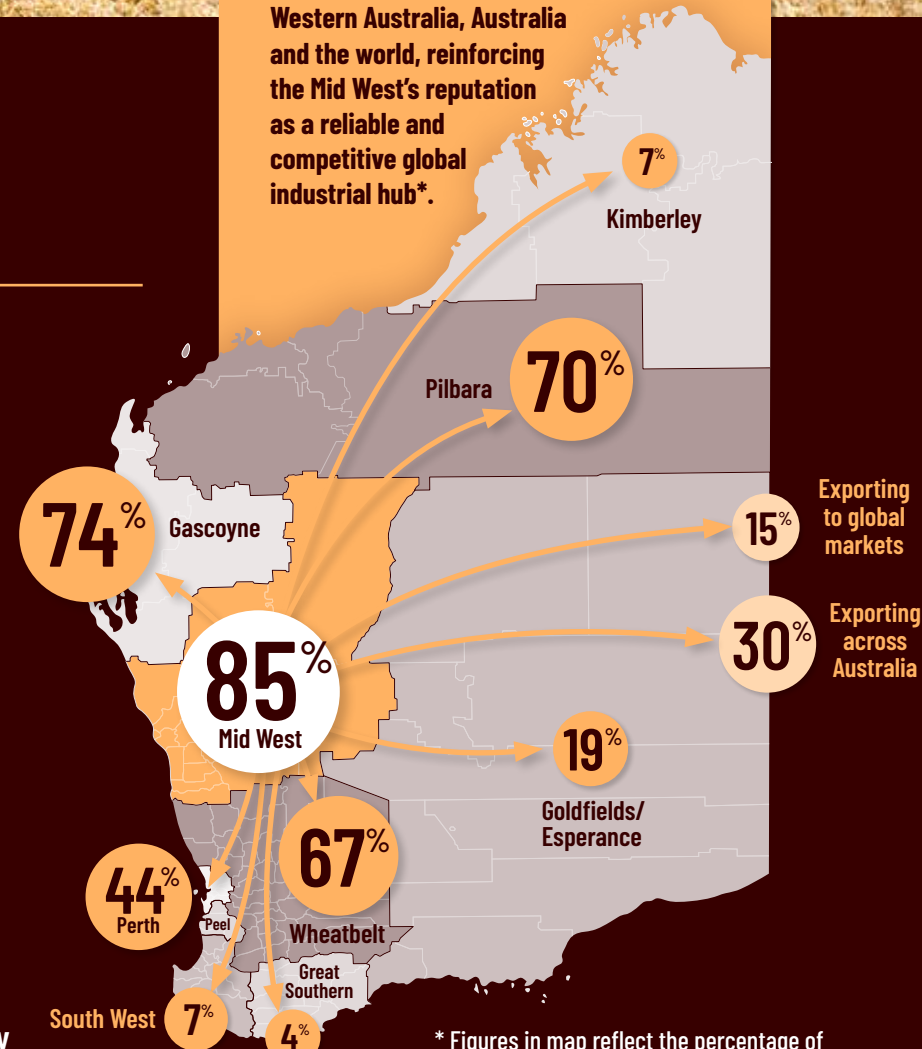

**Green metals / materials manufacturing**

**Professional and knowledge intensive supply chains supporting mining and agricultural activities**

Our region's businesses deliver high-quality, specialised services that support major projects across Western Australia, Australia and the world, reinforcing the Mid West's reputation as a reliable and competitive global industrial hub\*.

\* Figures in map reflect the percentage of businesses profiled in this prospectus who export goods and services to different areas. Figures are based on information provided directly by businesses at the time of publication, and do not capture industry wide statistics.

**Manufacturing is a cornerstone of the region's economy, with strong skills and capabilities across mining services, construction, agriculture, marine services and space-related industries.**

## Mid West Capabilities

### Construction and Civil Contracting

- Modular
- Civil
- Earthmoving
- Heavy haulage

### Engineering and Fabrication

- Design and drafting
- Fabrication and machining
- Industrial support services
- Agricultural equipment
- Steel manufacturing

### Electrical and Instrumentation

- Electrical installation
- Instrumentation and control systems
- Communications infrastructure

### Mechanical Services

- Mechanical repairs
- Hydraulics
- Auto-electrical
- Diagnostics

### Security and Fire

- Electronic security
- Fire safety
- Access control

### Coatings and Surface Treatments

- Protective coatings
- Abrasive and water blasting
- Spray and powder coating

### Labour Hire and Shut Down Services

- Project delivery
- Labour hire
- Shutdown services

MID WEST  
DEVELOPMENT  
COMMISSION

The Mid West Development Commission is committed to fostering growth and attracting investment. As a proactive and collaborative regional development agency, the Commission welcomes partnerships that drive sustainable economic development and enhance local capability.

This prospectus highlights the depth and diversity of Mid West businesses that contribute to the region's economic strengths and shows examples of public and private sector investment coming together to boost the region's capabilities.

**Together, they form the Mid West Advantage – a network of capability, innovation and opportunity.**

## Case Studies

Image: Geraldton Building Services and Cabinets (GBSC)  
- Kalbarri Skywalk

## Dongara Marine

### Cutting into the future and leading regional innovation

---

Dongara Marine, a trusted name in custom boat building since 1975, has taken a major step forward in advanced manufacturing with the installation of the Mid West region's first independently available Computer Numerical Control (CNC) machine. Enabled by a \$68,500 Regional Economic Development (RED) Grant from the State Government, through the Mid West Development Commission, this investment is transforming both operations and opportunities.

Previously reliant on outsourcing to Perth, Dongara Marine now performs precision cutting and shaping in-house - reducing delays, cutting waste, and boosting productivity by 10%. The CNC machine has halved the need for manual fabrication and freed up skilled labour for higher-value tasks.

This leap in capability has allowed the company to expand into cost-effective production of standard design vessels, enhancing its competitiveness in markets like government tenders, pilot boats, and rock lobster vessels. It's also fuelling local economic growth, with over 30 full-time staff and six apprentices gaining hands-on experience with cutting-edge technology.

Dongara Marine's story is a testament to how regional businesses can thrive through innovation, investment, and a commitment to excellence - strengthening Western Australia's marine industry from the inside out.

## GBSC

### Building the future

---

Geraldton Building Services and Cabinets (GBSC) has been shaping regional WA for over 24 years, delivering award-winning residential and commercial projects with a team of 99 skilled tradespeople, apprentices, and support staff. With offices in Geraldton and Kalbarri, GBSC's strength lies in its in-house workforce—carpenters, cabinetmakers, electricians, painters, and gyprockers - driving quality, cost-efficiency, and a strong team culture.

A \$100,000 RED Grant helped GBSC expand the Geraldton Modular Homes Factory—the first major modular facility north of Perth. This undercover, all-weather workspace has fast-tracked housing delivery and created 20 new jobs in its first year.

Modular construction offers faster build times, fewer weather delays, and consistent quality. With Geraldton's transport links, homes built locally are now reaching communities across the Mid West and Pilbara - reducing reliance on Perth and attracting new investment. GBSC's story is one of innovation, inclusion, and regional pride - proving that when you invest in people and place, the results go far beyond the build.

## JMH GROUP

### Driving safety and opportunity

---

In Geraldton, a transformative project is reshaping road safety and regional industry. JMH Group, a trusted name in mechanical services for mining, construction, and transport, has launched the Mid West region's first heavy vehicle brake testing facility - an initiative powered by a \$66,700 RED Grant from the State Government through the Mid West Development Commission.

This state-of-the-art facility is more than just a technical upgrade. It's a leap forward in preventative maintenance, enabling brake, steering, suspension, and weight checks in a single drive-through process. The benefits include reduced downtime, early fault detection, and safer roads across Western Australia.

But the impact doesn't stop there. Over the past year, the project has created five new jobs and opened doors for apprentices and workers to upskill in the heavy automotive and mining sectors. It's a catalyst for workforce development and a boost to local capability.

For operators, the advantages are immediate - no more long trips to Perth for assessments. This means more time on the job, greater efficiency, and improved productivity. For the region, it means a stronger, more competitive service sector supporting agriculture, mining, and transport.

This project stands as a powerful example of how targeted government investment can unlock business diversification, drive economic growth, and create lasting opportunities for local communities.

## NUFAB

### Transforming production capabilities

---

In Geraldton, Nufab Industries is redefining what's possible for regional manufacturing. Known for producing cutting-edge agricultural machinery and mining equipment, Nufab's commitment to innovation is helping farmers and miners across Australia manage soil sustainably and operate more efficiently.

With support from a \$146,700 RED Grant, Nufab invested in a high-definition CNC plasma cutting machine - an advanced tool that's transforming their production capabilities. Previously reliant on metropolitan or interstate services for precision cutting, the company now delivers high-grade, custom components locally, faster and more efficiently.

Since commissioning the machine in 2023, Nufab has seen remarkable results:

- 40% boost in component manufacturing efficiency
- Up to 32% increase in finished product capacity
- Seven new full-time jobs created
- Raw plate cutting efficiency improved from 65% to over 90%
- Significant reduction in metal waste through reuse of remnant materials.

This leap in capability is enabling Nufab to expand into new interstate markets and meet the fast-paced demands of the mining industry. It's also empowering the business to take a more strategic, planned approach to production - something previously out of reach.

Nufab's journey is a powerful example of how targeted investment can unlock regional potential, drive innovation, and create lasting economic and employment benefits.

# 3.1

## Boodjera Group WA

### Overview:

Boodjera Group WA is an Aboriginal-owned, diversified construction and infrastructure services collective delivering high-quality commercial, government, and regional projects across Western Australia. The Group provides a broad range of services, including commercial construction, government contracts, maintenance programs, and responsive infrastructure support.

With a focus on integrity, collaboration, and excellence, Boodjera Group engages closely with communities and stakeholders to ensure projects generate long-term social, economic, and cultural benefits. The company actively supports local workforce participation and capacity building, creating employment and skills development opportunities for Aboriginal and regional communities. This approach ensures projects not only meet client requirements but also strengthen regional economic and social outcomes.

Boodjera Group operates under rigorous safety, quality, and compliance frameworks, delivering projects that consistently meet government standards and regulatory requirements. Its Aboriginal leadership provides unique cultural insight and a commitment to inclusive, sustainable development across all projects. By combining technical expertise, industry experience, and innovative solutions, the Group delivers infrastructure and construction outcomes that support resilient and thriving communities throughout Western Australia.

### Highlights and Notable Projects:

- **Aboriginal-owned and operated:**  
Proudly Aboriginal-owned, with a commitment to promoting Indigenous employment and training opportunities.
- **Diverse project portfolio:**  
Has successfully completed a range of projects, including commercial renovations, school facility upgrades, and government housing renovations.
- **Community engagement:**  
Actively engages with local communities, ensuring that projects contribute to social and economic development.
- **Proven track record:**  
With over 224 completed projects and a strong client base, Boodjera Group has established itself as a trusted partner in the construction industry.

#### Certifications and Accreditations

- Housing Industry Association member
- Supply Nation registration
- Builders, Plumbing and Painters registrations

## 3.2

# Elite Electrical Contracting

### Overview:

Elite Electrical Contracting is a Western Australian company delivering specialised electrical services to the industrial, commercial, and mining sectors. Since its establishment in 2007, Elite has earned a reputation for completing projects on time, within budget, and to consistently high standards.

Operating out of offices in Geraldton and Meekatharra, Elite offers a comprehensive range of electrical and instrumentation services, supporting integrated construction and maintenance solutions. The company is particularly experienced in remote and challenging environments, where its reliability and technical proficiency are well recognised.

Maintenance crews are periodically deployed across Western Australia – from Badgingarra to Port Hedland, and east to Nullagine and Wiluna – ensuring responsive service coverage across key regions.

Elite is a trusted partner for complex electrical infrastructure projects, with a strong commitment to safety, quality and engineering excellence.

### Highlights and Notable Projects:

- Supply and installation of 1.1MW temporary backup power system for Geraldton Regional Hospital. Includes planning and coordination of high voltage shut down and backup power plan for continuous operation of a working regional hospital without interruption.
- Design and construction of one 13.5-metre and two 4.5-metre satellite antennas, mains power infrastructure upgrade and power generation system for the Swedish Space Corporation.

# 3.3 GCo Australia

## Overview:

GCo Australia is a specialist electrical services provider operating across the industrial and infrastructure sectors. The company's capabilities span service and breakdown response, labour hire and shutdown support, instrumentation, power generation and underground installations. With a strong foundation in professional and technical expertise, GCo Australia consistently delivers reliable, high-quality outcomes that meet and exceed client expectations. Its organisational structure is designed to support large-scale industrial and infrastructure projects nationwide, enabling efficient project execution and responsive service delivery.

Operating from purpose-built facilities in Geraldton, the company benefits from over 800m<sup>2</sup> of covered workspace, along with dedicated laydown and warehousing areas. GCo Australia employs approximately 70 personnel, including nine apprentices, reflecting a commitment to workforce development and industry sustainability.

Known for delivering results safely, efficiently and with integrity, and being backed by strong professional and technical expertise, GCo Australia is committed to exceeding client expectations and aims to be the leading electrical contractor for industrial and infrastructure projects nationwide.

## Highlights and Notable Projects:

- Lynas Rare Earths Processing Facility
- CBH Group's Broomehill rapid rail outloading facility
- Western Power network support
- Iluka Eneabba project – phase 2
- Watsia gas project
- Cape Lambert Dolphin Head life extension project
- Mid West Ports Authority ship loader 04 refurbishment
- SKAO camp
- Karara Export Terminal project
- Indurad ship loader 04 and 05 works
- Beharra Springs rectification project
- Labour hire (shift cover and shut down support) to many major mining and industrial clients

# Geraldton Building Services and Cabinets

**Overview:**

Geraldton Building Services and Cabinets (GBSC) is a multi-award-winning construction and electrical company with more than 24 years of experience delivering high-quality projects across regional Western Australia.

Based in Geraldton, the company provides a comprehensive range of manufacturing and building services including custom cabinet and joinery, modular construction, steel wall and roof truss framing. These services are complemented by their extensive range of building services, which include commercial construction, renovations and maintenance, shop fit-outs, insurance work, gyprocking and licenced electrical and painting services.

GBSC operates with a strong in-house workforce of project managers, supervisors, tradespeople, and apprentices, allowing it to deliver projects efficiently and to the highest standards. The company has extensive experience working in both urban and remote environments, with a proven track record of completing complex projects in challenging regional settings.

A recognised leader in workforce development, GBSC has trained and supported 162 apprentices and trainees since its establishment, with 21% identifying as Aboriginal. Today, the company continues this commitment to diversity and inclusion, employing 25 apprentices (25% Aboriginal and 20% female). This reflects GBSC's ongoing focus on creating career pathways and opportunities across the regions it serves.

Renowned for professionalism, craftsmanship, and community engagement, GBSC is dedicated to building lasting value for clients, communities, and industry partners while continuing to set the benchmark in regional construction and electrical services.

**Highlights and Notable Projects:**

- Kalbarri Skywalk
- Geraldton Amateur Basketball Association stadium
- Spalding AEG Park
- Geraldton Aboriginal Short Stay Accommodation project
- Geraldton Regional Cancer Centre
- East Wallabi Island infrastructure
- Geraldton Police Station refurbishments
- Geraldton Railway Station refurbishment
- Gascoyne Junction visitor stop
- Rocks Urban Laneway
- Geraldton Youth Centre Refurbishment

# 3.5 Lenane Holdings

## Overview:

Established in 1989 and based in Geraldton, Lenane Holdings is a trusted provider of civil works, earthmoving, and haulage solutions across the Mid West and regional Western Australia. With more than 30 years of industry experience, the company has earned a strong reputation for delivering reliable, efficient, and cost-effective services.

Lenane Holdings operates across diverse sectors including civil construction, oil and gas, mining, and industrial development. Its expertise spans road building, subdivisions, bulk earthworks, site preparation, access roads, rig site construction, haulage, and rehabilitation. The company also operates its own crushing and screening facilities, supplying a wide range of materials such as sand, gravel, and limestone to meet project needs.

Supported by a modern Caterpillar fleet and extensive heavy-haul transport capability, Lenane Holdings offers end-to-end project delivery, ensuring flexibility and efficiency in both metropolitan and remote locations.

A strong commitment to health, safety, and environmental standards underpins all operations, with accredited systems in place and all operators fully trained and qualified. This focus, combined with a hands-on, client-focused approach, has built enduring relationships across government, industry and the private sector.

## Highlights and Notable Projects:

- Construction of rig sites and access roads for Mitsui E&P
- Construction of site entry and laydown area at Newhaul premises
- Site haulage Iluka MSP
- Excavation of MWPA truck unloader
- Road maintenance for City of Geraldton- Greenough
- Iluka haul road seal
- BASF lake wall rebuild
- Strike Energy Peaking Power Station and Switch yard construction

# 3.6 Midwest Modular

## Overview:

Midwest Modular is a Geraldton-based company specialising in transportable (modular) buildings and steel-framed sheds, serving the Mid West, Goldfields and Pilbara regions of Western Australia.

With over a decade of regional expertise, the company delivers engineered modular homes, accommodation units, utility buildings, and durable sheds designed to withstand harsh Australian conditions. As a long-standing franchisee of Sheds n Homes, MI Global Construction (t/a Midwest Modular) supplies residential, rural, and commercial steel structures including garages, barns, patios, carports and industrial buildings using high-quality BlueScope steel and custom designs suited to local climates.

The company's in-house drafting, design, and estimating teams, based in Geraldton and Rockingham, ensure accurate and efficient project planning from concept to delivery.

Most modules are constructed off-site, allowing for fast build times, cost-effective pricing, and minimal disruption. Midwest Modular is trusted for its innovative and adaptable solutions, making it a preferred choice for remote properties, mining sites, and regional housing needs.

## Highlights and Notable Projects:

- Supply, transport and installation of staff housing in Karratha, designed to meet the demanding Pilbara region conditions
- Shire of Murchison Caravan park - new Ablution block
- Development of residential standard designs for 1, 2 and 3 bedroom homes
- Development of new modular branding - Midwest Modular

## Midwest Diverse Contracting

### Overview:

Midwest Diverse Contracting, established in 2010, is a civil contracting company based in Geraldton, Western Australia, with a strong reputation across the Mid West region.

Specialising in formwork and concrete works, Midwest Diverse Contracting delivers a wide range of services from slab-on-ground construction to complex bridge projects. The company also excels in tilt panel pre-cast fabrication and onsite concrete fabrication, offering tailored solutions to meet diverse project requirements.

With a focus on innovation and collaboration, Midwest Diverse Contracting partners with clients to provide efficient and high-quality concreting and civil construction outcomes. Its growth and expertise have positioned it as one of the leading concreting firms in the region, known for reliability, craftsmanship, and a commitment to delivering results that stand the test of time.

### Highlights and Notable Projects:

- Fortec – Nangetty / Walkaway Bridge Replacement - all formwork and concrete works
- GMA Garnet Thickener, Port Gregory – civil construction, formwork and concrete works
- QDC – new workshop sheds for Newhaul, civil construction, formwork and concrete works
- PITTS – Atlas Fuels Service Station – civil construction, formwork and concrete works
- Fortec – Mid West Ports Authority Berth 4 upgrade project – civil construction, formwork and concrete works
- Australian Defence Satellite Communications Station – new culvert construction
- Swedish Space Corporation – antennae base – civil construction, formwork and concrete works
- Bella – 7 Eleven Service Station, Webberton commercial development

# Oaks Civil Construction

## Overview:

Oaks Civil Construction is a 100% Aboriginal (Yamatji) owned and operated business, established in 2019 to deliver high-quality traffic management, civil construction, and labour hire services across Western Australia.

The company is driven by a mission to create meaningful employment pathways while setting a benchmark for service excellence within the industry. Oaks is committed to empowering diversity and building capacity in the local communities it serves, actively engaging with contractors who share its values and vision.

Services range from long-term infrastructure projects and short-term developments to responsive work orders, events management, emergency response, and routine maintenance.

Through its culturally grounded approach and dedication to quality outcomes, Oaks Civil Construction continues to influence positive change and foster inclusive growth within the civil construction and traffic management sectors.

## Highlights and Notable Projects:

- City of Greater Geraldton – traffic management contract
- Main Roads WA – panel traffic management, plant hire and vegetation clearing contract
- Mid West Ports Authority – car park and bus interchange upgrade
- Oakagee Access Road – traffic management
- Defence – Garden Island GEOINT space based sensors – foundations
- Tonkin Gap Project – traffic management
- Armadale line upgrade alliance – drainage
- Armadale line upgrade alliance – hard landscaping and insitu concreting works

## Red Dust Holdings

### Overview:

Red Dust Holdings (RDH) is a privately owned civil construction and earthmoving company delivering infrastructure solutions across regional and metropolitan Western Australia. Established in 2010, RDH operates from its head office in Geraldton, with additional operational and project support from a Perth-based office.

RDH provides a wide range of civil construction services, including bulk and detailed earthworks, road construction and upgrades, drainage and water infrastructure, site preparation and mining and resource support services. Working across key regional industries such as mining and resources, transport and logistics, agriculture, energy, utilities and government-led infrastructure programs, the company has extensive experience delivering projects in remote and challenging environments.

Employing more than 200 people, RDH manages a fleet of over 300 assets, supported by in-house field service vehicles and mechanics to maximise equipment availability and project efficiency. The company operates under ISO-accredited management systems, reflecting its commitment to safety, quality, environmental responsibility and consistent project delivery.

As a community-focused and equal opportunity employer, RDH actively supports local employment, training and work placement programs, as well as regional organisations, charities and sporting groups. Operating in many small regional communities, RDH is committed to creating opportunities, supporting local capability and leaving a positive legacy in the regions it serves.

### Highlights and Notable Projects:

- Heap leach pad construction and bulk earthworks at Binduli gold mine
- Site services at Golden Grove mine site
- Ord Street, Beresford subdivision
- Three Springs grain haul roads upgrade
- Eneabba rare earth refinery plant access road
- Ruvidini Inland Port access road
- Shine Iron Ore Mine access road upgrades
- Port of Geraldton rock wall repairs
- Karara mine drainage, culvert install and jet blasting
- Kalbarri National Park car parks
- South Western Highway major road repairs

## INCITE Security

### Overview:

INCITE Security is an integrated security solutions provider servicing regional and remote areas across Western Australia since 2006. The company supports a wide range of sectors including commercial, local government, ports, airports, education, industrial, defence, justice, and healthcare.

INCITE Security delivers reliable security products, ongoing monitoring, and responsive maintenance services throughout Greater Geraldton, the Mid West and beyond. Leveraging advanced technology, remote diagnostics and real-time reporting, the company ensures consistent and proactive support for its systems.

Its streamlined, end-to-end processes are backed by a dedicated team committed to professional and responsive service. Collaborations with leading manufacturers such as Gallagher and Motorola enable access to cutting-edge security innovations, reinforcing INCITE Security's reputation for quality and reliability in safeguarding critical infrastructure and facilities.

### Highlights and Notable Projects:

- 2 x \$3 million security upgrade projects at critical infrastructure locations in Regional WA
- Ongoing 24/7 servicing, maintenance, repairs and upgrades across 110+ government sites throughout the Mid West, Gascoyne, Goldfields, Wheatbelt, Pilbara, East Kimberley and Perth
- Security, access control, Closed Circuit TV (CCTV) and duress upgrades across 18 x WA police stations
- 100+ CCTV camera system upgrade and expansion at the Mid West Ports Authority
- 500+ CCTV cameras across 32 x health sites throughout regional WA and the Perth CBD

## Mitchell and Brown Communications

### Overview:

Mitchell and Brown Communications, Security and Fire is a specialist provider of integrated communication, security, and fire safety solutions tailored for commercial and industrial applications. With over 29 years of experience, the company has built a strong reputation for delivering reliable and efficient services across the Mid West region of Western Australia.

Its expertise spans the installation and maintenance of comprehensive communication networks, advanced security systems and fire protection infrastructure, ensuring clients benefit from robust and compliant systems that support operational safety and connectivity.

Mitchell and Brown's long-standing presence in the region reflects a commitment to quality, technical excellence, and customer-focused service, making it a trusted partner for businesses seeking dependable solutions in critical infrastructure and safety.

### Highlights and Notable Projects:

- Square Kilometre Array via Ventia Group
- Assist with the installation of the communications cable and Closed Circuit TV (CCTV) network at the accommodation village
- Termination and testing of optic fibres to service a project which includes 132,000 field antennas

**Key Services**

- Supply, installation and servicing of communications equipment
- Installations of satellite assets and Starlink
- 2way radios and repeater networks (marine and land)
- Installation and maintenance of communications towers from 30m freestanding to 70m guyed masts
- ML Comms own fibre splicers
- Optical Time-Domain Reflectometers
- JDSU's PON meters
- Freedom 8100 Comms System Analyser
- Plant and equipment: trucks, excavators, bobcats, chain diggers, no-dig vacuum trailers and a fleet of fully stocked 4WD service vehicles.

**Key Clients / Partners**

Asco | Beach Energy | City of Greater Geraldton |  
 Department of Fire and Emergency services | Node1 |  
 SXBB | St John Ambulance | Swoop

**Certifications and Accreditations**

- Australian Communications and Media Authority cablers licences with endorsements
- Class 2 Security Licence (pending)
- Draeger Alcohol Interlock certified installers
- Elevating Work Platform Licence | Excavator Licences | Motor Vehicle Repairers Licence
- NBN contractor cards and enAble NBN accredited | Working at heights accredited

4.3

**ML Communications**

**Overview:**

ML Communications is a specialist provider of communications equipment and services, supporting both small and large businesses across Western Australia. The company supplies, installs, and maintains satellite communication systems, two-way radio networks - including marine and land-based 27MHz, VHF and High Frequency (HF) systems for long-range communication.

With extensive experience in infrastructure deployment, ML Communications has installed and maintained over 90 communications towers, ranging from 30-metre freestanding structures to 70 metre guyed masts, for clients including Node1 and oil and gas companies. Technicians are fully qualified in RF, fibre, copper and rigging, and are available 24/7 for callouts.

The company is equipped with advanced in-house tooling, including fibre splicers, Optical Time Domain Reflectometers, Passive Optical Network (PON) meters and communications system analysers. Civil capabilities are supported by a fleet of trucks, mini excavators, bobcats, chain diggers and No-Dig vacuum systems.

ML Communications also maintains a range of gensets from 2kVA to 22kVA for use during electrical breakdowns. With a strong focus on technical expertise and responsive service, the company delivers reliable communication solutions tailored to the needs of diverse industries.

**Highlights and Notable Projects:**

- Supply, installation and maintenance of repeater networks, Node1 communication masts
- Supply and programming of Tait radios
- Installation of internet equipment to mining camps

## 5.1

# Bruce Rock Engineering

### Overview:

Bruce Rock Engineering is the largest manufacturer of road transport equipment in Western Australia and ranks third nationally.

The company leads the industry in the production of tipping-type trailers, manufacturing more than any other firm across Australia. With a strong reputation for quality and innovation, Bruce Rock Engineering supports the transport and logistics sector through advanced engineering and manufacturing capabilities.

In addition to its trailer production, the company operates a 16,000m<sup>2</sup> steel processing facility in Forrestfield, WA, enhancing its capacity to deliver large-scale fabrication and custom steel solutions. This facility plays a key role in supporting both internal manufacturing and external client needs, reinforcing Bruce Rock Engineering's position as a major contributor to Australia's heavy transport infrastructure.

### Highlights and Notable Projects:

A \$55 million business improvement / expansion project with a total of 16,000m<sup>2</sup> of covered area, which includes the largest plasma bed in the southern hemisphere, a laser tube cutter, robotic welding machine, temperature-controlled spray booths, self-recovering blast booths and workshop space for fabrication, assembly, service, maintenance and repair.

<b>Areas Served</b>	Mid West   Gascoyne   Perth   Pilbara   Wheatbelt   New South Wales   Queensland   Victoria   Africa   Papua New Guinea

- Federal Safety Commissioner accreditation
- National Association of Testing Authorities accreditation - non destructive testing
- Chamber of Commerce and Industry WA member

# 5.2 DIAB Engineering

**Overview:**

DIAB Engineering operates the largest fabrication workshop north of Perth, delivering end-to-end industrial services from its Geraldton base. Our capabilities span fabrication, machining, heat treatment, abrasive blasting, protective coatings and full Structural, Mechanical and Piping (SMP) and Electrical and Instrumentation (EI) site services.

We support mining and heavy industry with mine plant maintenance, labour hire, and a modern hire fleet, including 20 cranes (20-250 tonnes), transport equipment, trucks and mobile tool stores.

With an uncompromising focus on safety, reliability, and technical excellence, DIAB Engineering is a trusted partner for projects across regional and remote Western Australia.

**Highlights and Notable Projects:**

- Lynas Rare Earths:
  - Construction of the Mount Weld processing plant
  - Kalgoorlie processing facility filter building and wet circuit SMP and EI
- Liontown Resources: dry processing plant installation (SMP) at Kathleen Valley
- The world's largest tractor in Carnamah, Western Australia

# 5.3 Dongara Marine

## Overview:

Established in 1975, Dongara Marine is a leading Western Australian shipbuilder and marine service provider with several decades of proven performance. Operating from a modern waterfront facility in Geraldton, the company delivers vessel construction, maintenance, and refit services that meet the demanding standards of government and industry clients.

Dongara Marine builds and services vessels from 5 to 35 metres in length, with expertise spanning patrol, fisheries, offshore support, commercial operations, charter, tourism and recreational craft. Its capability includes custom aluminum and composite vessel construction, comprehensive maintenance and refit programs, and rapid-response repairs to ensure operational readiness.

The company operates under stringent quality, safety and compliance frameworks, ensuring all projects align with regulatory requirements and client specifications. Its Mid West location provides strategic access to regional, state and offshore operations, enabling timely support to government agencies and critical industries across Western Australia.

With a reputation built on reliability, technical expertise and quality workmanship, Dongara Marine continues to provide trusted, fit-for-purpose solutions that sustain maritime capability, safety, and efficiency.

## Highlights and Notable Projects:

- 13 new marine rescue Rigid Inflatable Boats (RIBs) of various sizes for the Department of Fire and Emergency Services
- Seven new lobster fishing vessels including three largest rock lobster fishing boats ever built in Australia – Holdfast, Poppa G and TEBCO
- Nine new patrol boats for various Government agencies including 25 metre fisheries patrol vessels for the Department of Primary Industries and Regional Development
- Six new pilot boats for various ports in Western Australia

# 5.4

## GE Group Australia

### Overview:

GE Group Australia is a Western Australian engineering and petrochemical services provider with proven capability across the mining, agricultural, marine, and petrochemical sectors. GE Group has three workshops strategically located at Perth, Geraldton and Karratha allowing fast response times to a diverse range of clients.

The company delivers specialist maintenance, repair, construction and asset support services, including marine propulsion and winch systems, mining equipment breakdown response, agricultural machinery repairs and maintenance, and the design, construction, operational management and routine servicing of bulk fuel and oil and gas assets.

GE Group's operations are underpinned by robust safety, compliance and procurement systems designed to meet government and industry project requirements. The company maintains established supplier networks and quality assurance processes, ensuring materials, parts and equipment are sourced quickly, efficiently and in accordance with regulatory and client standards. This procurement strength enables timely, cost-effective delivery in both metropolitan and remote regional environments.

With a collaborative approach, GE Group works closely with stakeholders to design tailored solutions that meet operational objectives on time and within budget. Its commitment to safety and reliability - expressed in the company ethos of "safely, every time, no matter what" - guides all aspects of project execution.

Recognised for consistent performance and technical expertise, GE Group is a trusted partner in supporting the capability, safety, and resilience of Western Australia's critical infrastructure and industrial operations.

### Highlights and Notable Projects:

- Design and construct various bulk fuel facilities across the Northern Territory, Goldfields and Pilbara regions
- Assembly and pre-delivery of five plot harvesters for Zurn Harvesting, Germany
- Routine condensate export from the Geraldton port on behalf of various oil and gas producers
- Cape Lambert lubrication system upgrade

# 5.5 GHS Solutions

## Overview:

GHS Solutions is a multidisciplinary service provider delivering engineering, fabrication and industrial support services across Western Australia. The company's capabilities include engineering design and drafting, metal fabrication, fitting and machining, conveyor installation, component supply, poly welding and fabrication, blast and paint, as well as scaffolding design, installation and hire.

Operating from advanced workshops in Geraldton, GHS Solutions combines technical expertise, extensive plant and equipment, and highly skilled personnel to deliver complex projects efficiently and to the highest quality standards. The company is equipped to support projects across industrial, mining, construction and regional infrastructure sectors, including remote and challenging environments.

A key strength of GHS Solutions is its robust procurement and supply chain management, ensuring materials, components and specialised equipment are sourced efficiently, reliably and in compliance with regulatory and project-specific requirements. The company operates under internationally recognised quality, environmental and safety standards, providing clients with confidence in the delivery of safe, compliant and cost-effective solutions.

GHS Solutions has worked extensively with Aurizon Rail to develop Extension of Life Repair Methodologies for their Mid West wagon fleets, resulting in grant funding by the WA Government to advance local manufacturing. This award has made the business rail ready, with dedicated mechanical and industrial coating workshops.

With a strong reputation for reliability, technical expertise and service excellence, GHS Solutions is a trusted partner for government and industry, delivering tailored solutions that support critical infrastructure, operational efficiency and long-term project outcomes across Western Australia.

## Highlights and Notable Projects:

- Useless Loop ship loader refurbishment project
- Golden Grove Rougher Bank upgrade project
- Iluka Rare Earths Eneabba Project
- St Francis Xavier Cathedral refurbishment project
- Kimberley Ports pile restoration project

# 5.6 KAEFER Australia

**Overview:**

At KAEFER, we deliver integrated mechanical and electrical services, access solutions, surface protection, insulation and cladding, passive fire protection, marine structures remediation, asbestos management, and other specialist services.

Our multidisciplinary teams work across major projects to provide tailored services that improve safety, efficiency and extend the life of assets. With more than 2,000 employees, we combine technical expertise with a strong commitment to quality, ensuring reliable outcomes for our clients.

Backed by 10 strategic branches, we provide seamless support to our site-based teams and the communities where we operate. From project delivery to ongoing maintenance, we bring together capability, experience and innovation to meet the complex needs of industry.

**Highlights and Notable Projects:**

- Inpex Ichthys Construction (2014-20) - \$700 million
- BHP Olympic Dam - Turnkey projects over \$100 million including Bismuth Antimony and Removal System, Alternative Backfill Delivery, Clarifier No.2 Refurbishment and Flotation Integrity Project
- Rio Tinto (WA) Structural Integrity Work (2019 - Ongoing) - over \$100 million of remediation work across multiple Pilbara sites including DSL
- Yara Maintenance and Shutdowns (2023 - Ongoing) - including \$45 million YPF turnaround 2023
- Waitsia Gas Project Stage 2 (2022-23) - \$5 million
- CBH - Geraldton Workhouse Re-sheeting (2020-21)

# 5.7 Moombaki Indigenous Technical Supply & Services

## Overview:

Moombaki is an Aboriginal-owned, female-led enterprise that delivers specialised engineering and procurement solutions to the energy, resources and defence sectors. With a strong cultural foundation and a sharp technical edge, Moombaki is redefining what it means to deliver high-performance services with purpose.

From valve repairs and pipeline testing to custom flow solutions, Moombaki's capabilities span workshop, onsite and engineering services. Whether calibrating Pressure Safety Valves (PSVs) to National Association of Testing Authorities (NATA) specs or designing bespoke valve control systems, Moombaki's work is precise, reliable and deeply rooted in sustainability and cultural values.

Moombaki is building pathways for Aboriginal participation in technical industries, creating long-term value for Country and community. Their Supply Nation certification and commitment to quality standards like ISO 9001, 14001 and 45001 reflect a business that's as principled as it is practical.

In a landscape where performance matters, Moombaki stands out - not just for what they do, but for how and why they do it. They're not chasing size, they're shaping impact - and they're doing it with integrity, innovation and Aboriginal leadership at the helm.

Moombaki is a movement toward inclusive industry excellence. With a commitment to sustainability, Aboriginal empowerment and technical innovation, Moombaki delivers solutions that honour Country while exceeding client expectations.

## Highlights and Notable Projects:

- Precision calibration and testing of PSVs to NATA standards, ensuring compliance and operational safety across critical infrastructure
- Designed and installed custom valve control systems for remote mining operations, integrating Aboriginal knowledge with advanced engineering for enhanced flow efficiency
- Fabrication and deployment of high-integrity stainless-steel valve assemblies for corrosive environments, supporting long-term durability in WA's harsh climate
- Onsite pipeline integrity testing and maintenance for resource sector clients, reducing downtime and improving asset reliability
- Procured and supplied marine-grade components for port infrastructure upgrades, demonstrating capability in high-spec, compliance-driven environments
- Partnered Tier 1 contractors to deliver Aboriginal participation frameworks on multi-million dollar shutdown projects, embedding cultural values into technical deliver
- Mobilised fully equipped, mine site-ready service vehicles across WA, enabling rapid response for valve repairs, testing and engineering support in remote locations

# Mansom Engineering

## Overview:

Mansom Engineering is a locally owned and operated machining and fabrication business that has been serving Western Australia since 1996. The company specialises in manufacturing, fabrication, repairs and modifications tailored to the needs of the mining, marine, transport and agriculture industries.

With decades of experience and a strong regional presence, Mansom Engineering delivers practical and reliable engineering solutions designed to meet the demands of heavy industry and remote operations. Its commitment to quality workmanship and responsive service has made it a trusted provider across multiple sectors, supporting both routine maintenance and complex project requirements.

Supplier and manufacturer of Original Equipment Manufacturer (OEM) replacement parts for the mining, agricultural, renewable energy and marine services industries.

## Highlights and Notable Projects:

- Antenna jig 'Starmaster' for the SKAO / CSIRO observatory
- Rope coiler - Mansom designed and patented

# 5.9 Raycol

## Overview:

Raycol Engineering, founded in 1975, is a respected Western Australian manufacturer of high-quality stainless steel aftermarket air seeder components - all proudly manufactured in Australia to withstand harsh climates and operating conditions.

Combining decades of expertise with advanced fabrication methods, including deployment of the Mid West region's first laser cutter as well as a waterjet cutter, Raycol continuously invests in product innovation and efficiency.

Experienced in meeting diverse client needs, Raycol supplies components tailored for major airseeder models such as John Deere, Flexi-Coil, Morris and more.

## Highlights and Notable Projects:

- Raycol's precision-engineered stainless steel secondary airseeder heads are exported globally
- Their sustained commitment to innovation, quality manufacturing and international trade underscores their role as a trusted partner in agricultural manufacturing

# 5.10 Reno Blast

## Overview:

Renoblast is a Western Australian company specialising in abrasive blasting, spray painting, liners and powder coating services.

Operating from a 10,000m<sup>2</sup> multi-faceted workshop in Narngulu, and supported by a mobile fleet of customised trucks, Renoblast delivers high-quality surface treatment solutions to clients across the State. The company employs skilled tradespeople and NACE / AMPP-qualified inspectors with extensive experience in selecting and applying protective coatings suited to diverse environmental conditions.

Services include maintenance programming, specification writing, and corrosion control strategies for asset protection. Equipped with advanced in-house tooling and a wide range of civil equipment, Renoblast is a trusted provider for industries requiring reliable and quality-assured surface treatment and coating solutions

## Highlights and Notable Projects:

- Kalbarri Skywalk
- Geraldton foreshore redevelopment

# 5.11 Technical Maintenance Support

## Overview:

Technical Maintenance Support (TMS) is a locally owned and operated company with a 13-year history of delivering high-quality maintenance and shutdown services to the mining industry across regional and remote areas of Western Australia and the Northern Territory.

Founded in 2012 by Wesley Johnson, TMS has grown into a trusted and thriving business, built on strong values and ethical standards. The company is structured into three key divisions; Administration, Workshop, and On-Site - enabling it to provide comprehensive support across all aspects of mining operations.

With a workforce of approximately 200 employees, TMS is led by a hands-on management team under the direction of its founder, ensuring a responsive and practical approach to client needs. Known for reliability, professionalism, and commitment to safety, TMS continues to play a vital role in supporting the operational efficiency of mining projects throughout the region.

## Highlights and Notable Projects:

- ILUKA - sand stacker remediations and restoration and upgrade works - \$2.4 million
- Karara - filter rails - major overhaul and upgrade works (\$11 million and counting) from fabrication offsite to the removal and installation of new onsite
- Pilbara Minerals - major chute upgrade project works - 22 chutes redesigned by our team in-house - drafted and fabricated with state-of-the-art ceramic ZTA lining systems

# Twomeys Mining and Engineering

## Overview:

Twomeys Mining and Engineering is a mine service contractor based in Geraldton, strategically positioned to support key mining regions including the Mid West, Gascoyne, Goldfields and Pilbara.

The company provides specialised fabrication and maintenance services for fixed mining plant infrastructure, ensuring operational reliability and safety across a range of mining operations. Twomeys also offers labour hire solutions for both project-based work and shutdown maintenance, supplying skilled personnel to meet the dynamic needs of the Western Australian mining industry.

Geraldton's proximity to Perth and its strong pool of experienced mine workers enhances Twomeys' ability to respond quickly and efficiently to client requirements. With a focus on quality workmanship and responsive service, Twomeys Mining and Engineering plays a vital role in supporting the productivity and sustainability of mining operations throughout the region.

## Highlights and Notable Projects:

- 50+ personnel shut downs completed
- Refurbishment of carbon-in-leach tanks
- Fabrication of structural steel package
- Fabrication of large-scale stainless steel and carbon steel piping packages
- Aluminium and stainless-steel fabrication

# 6.1 JMH Group

## Overview:

JMH Group is an Aboriginal-owned Western Australian service provider delivering integrated mechanical, auto electrical, and fabrication solutions to the mining, construction and road transport sectors. Operating from strategically located workshops and mobile field service units, the company provides efficient, reliable support for heavy machinery, fleet operations and mining services across regional and metropolitan areas.

JMH Group's capabilities include plant and equipment maintenance, undercarriage repairs, component supply, tooling hire and specialised contractor support. The company holds key industry authorisations, including Scania Parts and Service Agent status for the Mid West region, JCB Machinery Dealership license, and official distributorship for Groeneveld-Beka and FUCHS lubricants - ensuring compliance with manufacturer specifications and regulatory requirements.

With robust safety, quality and environmental management systems in place, JMH Group delivers projects that meet stringent government and industry standards. Its integrated service delivery model streamlines maintenance and repair processes, minimises downtime and enhances operational efficiency for clients.

As an Aboriginal-owned enterprise, JMH Group actively supports local employment, skills development, and community engagement, strengthening workforce participation across regional Western Australia.

Through technical expertise, strong supplier networks, and regional capability, the company has established a reputation as a trusted partner for government and industry clients, supporting the resilience, reliability, and sustainability of the State's mining, construction, and transport operations.

## Highlights and Notable Projects:

- Successful apprenticeship program with 24 signed-off apprentices
- Acquired Vac West industrial and Mid West sweeping contractors
- Implemented on-site brake and suspension testing equipment
- Installed 10-tonne and 6-tonne overhead cranes at the Geraldton workshop
- Recognised at the 2021 Mid West Chamber of Commerce Business Excellence Awards
  - Business of the Year
  - Large Business of the Year

# 6.2 Nufab

## Overview:

Founded in Dongara in 1978, Nufab Industries is a proud Western Australian manufacturer that delivering cutting-edge industrial and agricultural machinery solutions. With over 45 years of experience, Nufab designs and fabricates its full product range – spanning deep rippers, spreaders, grain cleaners and compost turners - locally in the Mid West, supported by in-house 3D modelling and national parts availability.

Nufab’s engineering expertise is underpinned by innovation and durability. The award-winning “Spread-It” FBB spreader applies fertiliser, lime, gypsum, compost, gravel and clay - with precision up to 12 metres wide and is adaptable for mine-site rehabilitation, road maintenance and broadacre farming. The ultra-deep Hydramax Deep Ripper delivers up to 800mm of soil penetration, breaking compaction and promoting subsoil health through advanced hydraulic technology.

Nufab’s Grain Cleaners, providing cleaning rates of up to 100 tonnes per hour, are built for reliability, high throughputs and versatile grain types under harsh Australian conditions. One of the largest employers of apprentices in the region, Nufab was named Mid West Chamber of Commerce and Industry Business of the Year (2024) and a finalist in the WA Regional Business Excellence Awards (2025).

## Highlights and Notable Projects:

- National supply of its “Spread-It” FBB Spreaders and Hydramax Deep Rippers, uniquely designed for WA soil conditions
- Minesite rehabilitation equipment

**MID WEST  
DEVELOPMENT  
COMMISSION**

This Capability Overview provides a snapshot of the depth and diversity of expertise within the Mid West's manufacturing industries, including mining services, construction, agriculture, marine and space-related sectors. It is not exhaustive, and there are many opportunities we can assist with to connect you with local suppliers who can add value to your project.

Our team can help you explore local capability and link you with the right suppliers for your needs.

We are also committed to keeping this Capability Overview current and expanding it to showcase specific industry sectors. Mid West businesses not yet featured are invited to get in touch to ensure their capabilities are included in future editions.

**The Mid West Development Commission  
welcomes all feedback on this publication  
and welcomes any further enquiries.**
